Experience

Webmaster for Uppsalas River Rafting event (Forsränningen)
Student union of Engineering and Science students at Uppsala University (UTN)
2022 (November - May)
During the spring of 2022 I was responsible for updating and maintaining the website for the River Rafting event that is held each year in Uppsala. This included designing the website, and making relevant updates about the event. I was also responsible for the sign up system for all of the student's who wanted to participate in the river rafting.

Webmaster for the reception of new engineering and science students
Union of Engineering and Science students at Uppsala University (UTN)
2021 (February - October)
During my second year at Uppsala University, I was responsible for updating and maintaining the student union's website and application for new students. This included updating all relevant information and design on the website and on the application (for IOS and android) and the website.

Education

Bachelor's programme in Computer Science (current)
Uppsala University
August 2019 - June 2022
At Uppsala University I have studied a wide range of classes, some focused on algorithms and data structures, operating systems, secure computer systems, process-, object- and imperative programming. But also courses in project management in software engineering, databases, system design with a user perspective, and interaction design.

Santa Monica College
August 2018 - June 2019
At Santa Monica College I did not study a whole programme, but took classes I found interesting. Some potentially relevant are Frontend development, Computer information systems, Social media marketing, Art history, and English.

Technical skills

During my time in school I have worked with Github and I have also taken a course in agile methodology (scrum and Kanban).

Languages I have experience in are:

- HTML
- CSS
- Javascript
- React Native
- SQL
- C
- Java
- Python
- Haskell
